

## **Screw Conveyor Corporation Celebrates 75 Years of Success**

For 75 years, Screw Conveyor Corporation (SCC) has led the bulk material handling industry via a focus on quality, customer service and engineered product solutions. In 2007, SCC celebrates its 75th anniversary with news of continued success and burgeoning growth — a tradition that has stretched through three generations of the founding family.

SCC founder Clarence Abraham was a gifted machinery designer who developed new manufacturing processes for flighting — the screw-like assembly still in wide use today in bulk material handling equipment. His son Donald brought to market new products like the Screw-Lift<sup>®</sup>, the Super-Flo<sup>®</sup> and the Kewanee<sup>®</sup> Truck Dumper and built production facilities in Mississippi, California and Kansas to meet the strong demand for these industry-dominating solutions. Today's generation of SCC leadership is Garry Abraham, who has doubled sales in the past four years and brought SCC into the international marketplace with the addition of Screw Conveyor de Mexico in Guadalajara, Jalisco, Mexico.

Today, Screw Conveyor Corporation continues its tradition of innovation and growth through capital investment, a growing workforce and expanded sales reach via Manufacturer Representative sales organizations. These elements build on SCC's unwavering commitment to providing products of impeccable quality that exceed customer expectations. For 75 years, Screw Conveyor Corporation has maintained a tradition of excellence with the "Experience To Handle It Right<sup>®</sup>."

### **About Screw Conveyor Corporation**

For over 75 years, Screw Conveyor Corporation has been a leading manufacturer of bulk material handling equipment. Its product line includes screw conveyors, Super-Flo<sup>®</sup> and Super-V<sup>™</sup> drag conveyors, bucket elevators, Enduro-Flo<sup>®</sup> industrial duty en masse conveyors and Kewanee<sup>®</sup> hydraulic truck dumpers. The firm's headquarters are located in Hammond, Indiana with additional manufacturing and service facilities in Winona, Mississippi; Chanute, Kansas; Visalia, California; and Guadalajara, Mexico. A family-owned business, Screw Conveyor has supported the bulk material handling industry with innovative, industry-leading products.
