Speaker: Alan Lundeen, Sr. Program Manager, Standards and Technical
Services, WA Department of Labor and Industries, DOSH (*confirmed*)

11:15am - Break

11:30am - Cracking the New Walking & Working Surface Regulation
Speaker: Jim Seibert, NGFA

The Walking-Working Surfaces standard can be viewed from the perspective of two major categories: One relates to the hazards associated with falls at the same level; and the other relates to the hazards associated with falls from elevated surfaces. This session touches on several areas of consideration such as maintaining a clean workplace, providing safe access to and egress from any

horizontal or vertical surface on or through which a person walks, works, or gains access to a workplace location.

- Understanding Walking & Working Surfaces Final Rule
 - Key terminology and concepts
 - Letters of interpretation that show how OSHA responds to implementation questions
- Housekeeping
- The difference between standard rail guards and handrails
- Hazards of wall and floor holes
- Specifications for safe design and construction of fixed general industry stairs
- Minimum requirements for dockboards
- Proper care and use of portable ladders
- Training Requirements
- Fall Protection Program
- Rolling Stock Fall Protection
